

It has come to my attention that Bellsouth has petitioned the FCC to stop regulating them. I think that it is imperative that the FCC continue to regulate broadband service and its pricing. I also believe it is important that consumers should have access to all ISPs and not just ones provided by large phone companies. I don't believe any one company or a small handful of large companies should have a monopoly on the ISP business. That is why I'm asking the FCC to continue to regulate broadband pricing and to require phone companies to provide connection to broadband services to providers large or small (independent).

Please continue regulating broadband service
